## PREMISLIDE 76+

PremiSlide 76+ is an innovative system of retracting and sliding patio doors / doors, combining the ease of use of the HS lift and slide systems with the high tightness of the PSK tilt and slide systems.

The **innovative** locking mechanism is easy and intuitive to use, and also allows you to design both **small windows and large sliding doors**.

**Opening** the windows / doors takes place first by setting the movable sash away from the frame, and then freely **sliding** on the trolleys in relation to the non-opening parts of the structure.

**SOFT  
CLOSE**

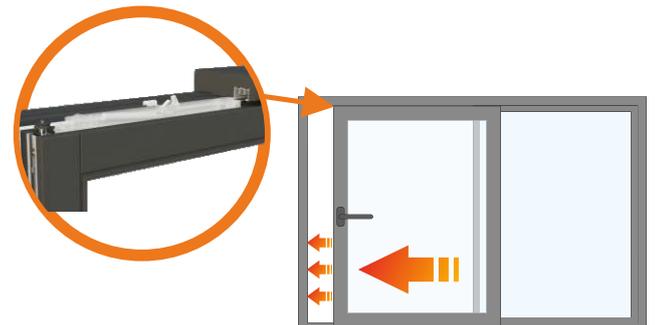

It is possible to use the integrated **SOFT CLOSE** cushioning. It is a completely hidden mechanism that **slows down** the sash movement in the final phase of closing. **SOFT CLOSE** ensures comfortable closing of windows, prevents damage resulting from improper operation, and protects against trapping.

Thanks to properly matched sash gaskets, which are pressed against the frame along the **entire circumference**, PremiSlide 76+ achieves **very good parameters** in terms of air permeability, water tightness and resistance to wind pressure.

The separate function of the sash allows **slit ventilation** without unnecessary heat loss.

**PremiSlide 76+** is a perfect solution suitable for both **residential buildings and public facilities**, such as schools or offices, where ease of use and reliability are expected from patio doors.

### Outstanding Features:

- ✓ Perfect thermal insulation coefficient. **Uw value from 0.70 W (m<sup>2</sup>K).**
- ✓ Possibility to install glazed units **up to 50 mm.**
- ✓ High **tightness** - effective protection against wind and heavy rain.
- ✓ Easy, intuitive operation.
- ✓ Soft closing of the sashes with optional **SOFT CLOSE** cushioning.
- ✓ Effective **ventilation.**
- ✓ **Narrow** profile both in the fixed and movable part.
- ✓ Compatible with the **PK76 Innovo +** system.
- ✓ A wide range of applications (window or patio doors).
- ✓ Easy and quick **assembly.**
- ✓ **Lower price** compared to HS.
- ✓ High-quality **EPDM** gasket.
